

# WEB FEET

*The best of the Web — without the worry*

Anyone can publish a Web page. The content need not undergo any review or verification. What's more, the number of Web pages doubles every one to two years. Can you be sure users are finding the information they need among the clutter?

Now, Gale™ offers an alternative. *WEB FEET* delivers screened, educator-selected Web sites covering hundreds of topics. Expertly chosen, rigorously reviewed, fully annotated, professionally cataloged and continuously updated Web sites are now within your reach.

## Delivering confidence

*WEB FEET* delivers sites your users can search with confidence. Thousands of relevant, high-quality sites are complemented by *WEB FEET*'s easy-to-use format, which encourages independent searching.

*WEB FEET* is searchable in a variety of practical, easy-to-use ways, including keyword(s), subject, author/source, title of Web site, grade levels, audience, curriculum areas, Library of Congress (LC) subject heading, LC call number and Dewey call number.

Each site chosen for *WEB FEET* is selected and reviewed by librarians and educators. Sites are evaluated according to several criteria:

### Source

- The source of information is identified
- The contact information is displayed
- The expertise of the source is considered: preferably a qualified professional at a peer-reviewed site or a government (.gov), educational institution (.edu) or respected organization (.org) site
- The reputation of the site's host is considered: preferably a .gov, .edu or respected .org name

### Information

- The information is not easily available from other searches
- Reviewers make every attempt to ensure that the information is free of errors
- The content is objective, and not politically, religiously or otherwise biased
- The information has sufficient scope to cover the topic
- Sponsorship is clearly identified and advertising is minimal
- The necessary disclaimers and privacy statements are posted
- Chat rooms and message boards are reviewed for inappropriate exchanges

And all the information is professionally annotated and cataloged — providing “at a glance” assurance that retrieved results match your search criteria.

### Timeliness

- The site is updated frequently
- The site shows the date of the most recent update or the dating of the information

### Links

- Links are relevant, appropriate and functional
- At gateway sites, links are checked for content

## What will users find?

- *WEB FEET K-8 Collection*. This essential selection of Web sites spans the core subjects. From primary-grade topics like the alphabet, animals, colors and music to cross-curricular content aimed at older children, *WEB FEET* delivers appropriate references for students, teachers and media specialists
- *WEB FEET Core Collection*. Find selected curriculum-oriented and general reference sites suitable for middle and high school grades and beyond
- *WEB FEET K-12 Collection*. This product combines the resources of K-8 and Core collections. Meets a wide range of student and educator needs with searches limited to specific grades and curriculum topics
- *WEB FEET Health Collection*. When the stakes are high, trust *WEB FEET*'s clinically reviewed health collection for authoritative and consistently updated results covering topics from general wellness to specific diseases and disorders
- *WEB FEET Academic Library Collection*. This product offers the Core collection augmented by more advanced academic topics. Ideal for community colleges and other higher-learning institutions
- *WEB FEET Public Library Collection*. This combination of the Core collection and extra topics of personal interest like business and health delivers timely and accurate information to the researching public

## Online convenience

*WEB FEET* is available through the all-access convenience of your Internet browser. Its intuitive interface makes it easy to search by keyword, audience, grade level, language, curriculum area and more. At the same time, you can build a “Webliography” to e-mail, print or save on your homepage.

Or opt for *WEB FEET* in the popular MARC format, which is easily loaded into most library automation systems.
